

Abstract of the Disclosure

Selecting Functions Via A Graphical User Interface

Apparatus for processing image data is provided, comprising
5 processing means, storage means, display means and stylus-like manually
operable input means, wherein said processing means is configured to
perform functions upon image data in response to an operator manually
selecting a function from a function menu; said processing means responds
to a first user-generated input command so as to display a plurality of
10 function gates at a cursor position; movement of the stylus-like manually
operable input means so as to move said cursor through one of said function
gates results in a related menu being displayed; and manual selection of a
function from said displayed menu results in the selected function being
performed upon said image data.
